

## Notes for Statement of Work

The EPA will provide the Contractor with

1. Five (5) transcript documents containing the testimonies of a number of people who provided verbal comments during the EPA public hearings.
2. Up to possibly 200 pages of documents in Word or pdf format containing written comments.
3. A list of topics under which comments from items 1 and 2 shall be sorted.
4. Access to an Outlook folder containing up to possibly 10,000 identical emails from different commenters.

The Contractor shall generate a Word document consisting of public comments extracted from items 1 and 2 above and sorted under the list of topics provided per item 3 above.

The five (5) public hearing transcripts contain 840 pages of testimonies by different individuals. The transcripts are in pdf format from which sentences or phrases can be highlighted, copied and pasted into the topic categories document.

There will be approximately 200 pages of written correspondence from letters or emails that will need to be sorted out into topic categories. The written correspondence will be in Microsoft Word or pdf format with the name of the commenter included to identify who made the comments.

As the different sentences or paragraphs from the letters and testimonies are sorted out into the appropriate topics, the name of the commenter who wrote the letter, sent the email or gave the testimony should be included after each extracted portion of the letter, email or testimony placed under the topic.

The Contractor shall review of approximately 9,000 – 10,000 Outlook emails that are mostly identical, to identify if any additional comment lines may have been added by the individual senders. The emails originated from this website: [ HYPERLINK

"[http://org.salsalabs.com/o/676/p/dia/action4/common/public/?action\\_KEY=21716&tag=mining](http://org.salsalabs.com/o/676/p/dia/action4/common/public/?action_KEY=21716&tag=mining)" ]

The email consists of the template that can be edited by the email sender. Most of the template emails received appear to include no edits to the template. However, if the Contractor identifies any edits to the template or additional comments added to the template email by the individual sender, the edited portion or additional comment should be copied and pasted into the topic categories document under the appropriate comment and the name of the person who made the comment included after the comment. The template topic have already been placed into the topic list document.

Template for Mass Email:

*Dear EPA,*

*Thank you for the opportunity to comment on the Underground Injection Control Program's Draft Permits for the Proposed Dewey-Burdock Uranium Mine and Deep Disposal Wells.*

*The proposed mine and deep disposal wells are in an area that is documented to have faults, fractures, breccia pipes, and over 7000 old boreholes that have not been properly plugged. It will be impossible to contain mining fluids or waste liquids, and contamination of groundwater resources is very likely.*

*I am also concerned that adequate oversight of the quality of liquid wastes pumped into the Minnelusa Formation through the proposed deep disposal wells will be inadequate, and groundwater is likely to be contaminated.*

*A full survey of cultural and historical sites is needed before mining or deep disposal is allowed. Cultural and historical sites must be protected.*

*The history of uranium mining indicates that uranium mining cannot be done without creating and leaving contamination. Groundwater has never been returned to its original condition at any In-Situ leach uranium mine in the U.S. These permits should not be issued until it can be demonstrated that groundwater resources will be protected.*

**Ex. 6 Personal Privacy (PP)**

**Deliverables:**

Final Microsoft Word document containing all the comments separated out by topic. The contractor may format the document in any manner that facilitates document generation and review as long as the topic headings are clearly identified. The EPA would like a two (2) bound paper copies and an electronic file of the final document.
